

MobiBanc

Mobile banking (also known as M-Banking) is a term used for performing balance checks, account transactions, payments, credit applications and other banking transactions through a mobile device such as a mobile phone or Personal Digital Assistant (PDA).

MobiBanc offers an easy, convenient and safe mode of conducting financial transactions with a mobile phone. It enables hassle-free banking experience at a lower cost for bank customers.

MobiBanc is modular and scalable, which means that the banks can offer services based on customer requirement and add or modifying them with changing needs. Banks can thus offer personalized user experience.

MobiBanc offers customers user-friendly applications and displays that fit on the screens of mobile phones and other hand-held devices. With more and more people accessing services through their mobile phones, smartphones and other hand-held devices, banks can extend the reach of their services to an increasingly mobile customer base.

MobiBanc is designed in a way that it allows the bank to customize the Application UI with minimum efforts to stand out in the market. **MobiBanc** gives the liberty of listing out the regular tasks & also allows users to perform frequent tasks and to monitor financial/non-financial activities in few clicks.

MobiBanc overcomes the challenges posed by diverse operating systems and dissimilar handsets. It thus truly facilitates the achievement of the objectives of financial inclusion.

MobiBanc is deployable on-site or on the cloud through ASPs.
